Asian Conference on Design and Digital Engineering
Booyong Hotel & Resort, Jeju Korea
October 25-28, 2016

Organized by
Society for Computational Design and Engineering

Co-Organized by
China Society for Industrial and Applied Mathematics,
Japan Society of Mechanical Engineers
Computational Design and Optimization I

1–1 Simple Offset Algorithm for Generating Workpiece Solid Model for Milling Simulation ................................................................. 2
Masatomo Inui1,#, Nobuyuki Umezu1 and Masashi Tsukahara2
(1 Dept. of Intelligent Systems Engineering, Ibaraki University, 2 Dept. of Intelligent Systems Engineering, Ibaraki University, Currently at TechnoPro Inc.)

1–2 Dynamic Simulation of Optimal Control Framework for Floating Articulated Body ................................................................. 3
Young-Dae Hong1 and Bumjoo Lee2,#
(1 Department of Electrical and Computer Engineering, Ajou University, 2 Department of Electrical Engineering, Myongji University)

1–3 Evolutionary Optimization for Feasible Navigational Commands to Humanoid Robots ................................................................. 4
Young-Dae Hong1 and Bumjoo Lee2,#
(1 Department of Electrical and Computer Engineering, Ajou University, 2 Department of Electrical Engineering, Myongji University)

1–4 MudGet: Reproduction of the Desired Lighting Environment using a Smart–LED ................................................................. 5
Yong Hwi Kim, Yong Yi Lee, Bilal Ahmed, Moon Gu Son, Junho Choi, Jong Hun Lee and Kwan H. Lee#
(School of Mechanical Engineering, GIST, Rep. of Korea)
PLM & Smart Manufacturing I

2-1 Equipment Library Management System for Plant Collaborative Engineering

Soonhung Han¹, Byungwoo Min², Duhwan Mun³, Hyun Chan Lee⁴, Sehyun Myung⁵, and Byung Chul Kim⁶,#
(¹ Department of Mechanical Engineering, Korea Advanced Institute of Science and Technology, ² Zitto Co., Ltd., ³ Department of Precision Mechanical Engineering, Kyungpook National University, ⁴ Department of Industrial Engineering, Hongik University, ⁵ Department of Green Automotive Engineering, Youngsan University, ⁶ Department of Mechanical Engineering, Dong-A University)

2-2 SW Test Methodology for Plant Equipment Library Management System Development

Soonhung Han¹, Byungwoo Min², Duhwan Mun³, Hyun Chan Lee⁴, Byung Chul Kim⁵, and Sehyun Myung⁶,#
(¹ Department of Mechanical Engineering, Korea Advanced Institute of Science and Technology, ² Zitto Co., Ltd., ³ Department of Precision Mechanical Engineering, Kyungpook National University, ⁴ Department of Industrial Engineering, Hongik University, ⁵ Department of Mechanical Engineering, Dong-A University, ⁶ Department of Green Automotive Engineering, Youngsan University)

2-3 Development of mapping table for the exchange of design catalog data between Intergraph S3D and AVEVA PDMS

Donguk Kim¹, Dongil Kang², Duhwan Mun³ and Soonhung Han¹,#
(¹ Graduate School of Ocean Systems Engineering, Department of Mechanical Engineering, KAIST, ² ICT Center, Samsung Heavy Industries, ³ Department of Precision Mechanical Engineering, Kyungpook National University)

2-4 Design and Implementation of a Factory-level CPS for a Micro Smart Factory

Wen Bin Zhao¹, Young Jun Jung¹, Kyu Tae Park¹, Sang Do Noh¹,#, Hyun Kim² and JiYeun Son²
(¹ Dept. of Systems Management Engineering, SungKyunKwan Univ., ² Smart Home & Factory Research Department, Electronics and Telecommunications Research Institute)

2-5 Design of a knowledge repository for a virtual plant management system

Jae Hyun Lee¹,# and Hyo Won Suh²
(¹ Industrial engineering dept, Daegu university, ² Industrial and system engineering dept, KAIST)
Design & Architecture & Shipbuilding I

3–1 A Methodology of Code Checking System for Design Quality Checking based on BIM .............................................. 13
Jungsik Choi¹ and Inhan Kim²
(¹ Research Professor, Department of Architecture, Kyung Hee University, ² Professor, Department of Architecture, Kyung Hee University)

3–2 Development of a logic rule–based mechanism for converting Korean Building Act sentences into a computer–executable form .......... 14
Jin-Kook Lee¹, Hayan Kim¹ and Jaeyoung Shin¹
(¹ Department of Interior Architecture Design, Hanyang University)

3–3 Webized CAD system with HTML5 Annotation on the Web .......... 16
Daeil Seo¹ and Byounghyun Yoo¹,²
(¹ Center for Imaging Media Research, Korea Institute of Science and Technology, ² HCI & Robotics, University of Science and Technology)

3–4 A Correlative Classifiers Approach based on and Sample Set Method for Tracking Occluded Target ........................................ 17
Kang Li¹,², Fazhi He¹,² and Jian Zhang¹,²
(¹ State Key Laboratory of Software Engineering, Wuhan University, ² School of Computer Science, Wuhan University)

New Media & Interaction I

4–1 System for Evaluation and Improvement of Smart Appliance Interface Based on User Tests .............................................. 19
Tatsuki Kori¹, Hideki Aoyama¹
(¹ School of Integrated Design Engineering, Keio University)

4–2 Development of a flexible roll forming machine for cutting curved parts with virtual prototyping technology ................................ 20
Hong-Seok Park¹ and Duc-Viet Dang¹
(¹ School of Mechanical Engineering, University of Ulsan)

4–3 Human Interaction based Virtual Simulator for Military Training ...... 21
Soyeon Lee¹, Jaehyun Lim, Kyoil Chung and Sangjoon Park
(Electronics and Telecommunications Research Institute)

4–4 Driver Protection System Based on Machine Learning and Automated Driving Technologies ............................................. 22
Sung Moon Yoon¹, Prof. Sang Hun Lee¹, Min Hwa Jung¹, Sang Soo Kim², Hyun Sug Song², Woo Chul Shin², Young Keun Choi⁷
(¹ Automotive Engineering, Kookmin University, ² Computer Science & Engineering, Kookmin University)
4–5 Mixed-reality game for enhancing uniqueness of user creation in a collaborative music practice environment. ........................................... 23
Jocelyne A. Kiss1, Juan R. Nino1
(1 Laval University, Music Faculty 1055, 2 Laval University, Music Faculty 1055)

4–6 Visualizing Finite Element Analysis Results With Mobile Augmented Reality ................................................................. 24
Wenkai Li1, S.K.Ong1,2 and A.Y.C.Nee1,2
(1 Graduate School for Integrative Sciences and Engineering, National University of Singapore, 2 Mechanical Engineering Department, National University of Singapore)

Computational Design and Optimization II

5–1 A Study on the Probability of Damage ................................................................. 26
Hwan Il Kang1, Hyun Soo Kim1,2 and Gun In Kim2
(1 Dept. of Information & Communication Eng., Myongji University, 2 Dept. of Military Science, Konkuk University)

5–2 The Vulnerability Assessment of Hydro–pneumatic Suspension of Ground Combat Vehicles Using Vulnerable Area Method and DMEA ........................................... 27
Myung Hoon Nam1, Kang Park2, Woo Seong Park2 and Chul Yoo2
(1 School of Mechanical Engineering, Myongji University, 2 Department of Mechanical Engineering, Myongji University)

5–3 Stack Structured Hybrid Load Cell for High Stroke System ....................... 28
Jin-Yeong Rhee1, Bumjoo Lee1,2
(1 Department of Electrical Engineering, Myongji University)

5–4 Study of Inverse Kinematics for Redundant Manipulator Based on Optimization Scheme ......................................................... 29
Jin-Yeong Rhee1, Myong-Jin Song1 and Bumjoo Lee1,2
(1 Department of Electrical Engineering, Myongji University)

PLM & Smart Manufacturing II

6–1 Automated ontology construction used by LDA and WordNet clustering ..................................................................................... 31
Yun Byeong-II1, Suh Hyo-Won1
(1 Dept. of Industrial and System Engineering, Korea Advanced Institute of Science and Technology)
6–2 Exchange of equipment and materials' specifications data using iRINGTools for nuclear power plants ........................................... 32
Bongcheol Kim¹, Sangjin Park¹, Soonjo Kwon², Su-jin Byon³, Byung Chul Kim⁴, Duhwan Mun⁵,* and Soonhung Han²
(¹ Department of Precision Mechanical Engineering, Kyungpook National University, ² Graduate School of Ocean System Engineering, Department of Mechanical Engineering, Korea Advanced Institute of Science and Technology, ³ Central Research Institute, Korea Hydro & Nuclear Power Co., Ltd, ⁴ Department of Mechanical Engineering, Dong-A University)

6–3 Development of an ISO 15926–based data integration platform for design, manufacture, and construction data in the process plant industry .... 33
Sangjin Park¹, Bongcheol Kim¹, Byung Chul Kim², Hans Teijgeler³, Sehyun Myung⁴ and Duhwan Mun¹,*
(¹ Department of Precision Mechanical Engineering, Kyungpook National University, ² Department of Mechanical Engineering, Dong-A University, ³ OntoConsult, Netherlands, ⁴ Department of Green Automotive Engineering, Youngsan University)

6–4 An algorithm to suggest optimal level-of-detail of a 3D CAD model for the simplification ................................................................. 34
Soonjo Kwon¹, Hyungki Kim², Duhwan Mun⁵,* and Soonhung Han¹
(¹ Graduate School of Ocean Systems Engineering, Department of Mechanical Engineering, KAIST, ² Mechanical Systems Safety Research Division, Korea Institute of Machinery and Materials, ³ Department of Precision Mechanical Engineering, Kyungpook National University)

Design & Architecture & Shipbuilding II

7–1 Registration of Point Clouds using Surfacebased Correspondence Search ................................................................. 36
Dongho Yun¹, Seonghyun Moon¹, Jin-Eon Park¹, Jigun Kim¹ and Kwanghee Ko¹,*
(¹ Gwangju Institute of Science and Technology)

7–2 Conversion of scanned model of 3D building interior to a CAD model ......................................................................................... 37
Liu Shengyu¹, Han Soonhung³,* Chung Hyun¹ and Daniel Saakes²
(¹ Graduate School of Ocean Systems Engineering, KAIST, ² Industrial Design Department, KAIST)

7–3 Web–based framework for the exchange between heterogeneous procedural 3D CAD models using TransCAD and X3DOM ................................................. 38
Imgyu Kim¹, Soonjo Kwon¹, Youngki Kim¹, Inwhan Lee¹, Hyungki Kim² and Soonhung Han¹,*
(¹ Graduate School of Ocean Systems Engineering, Department of Mechanical Engineering, KAIST, ² Mechanical Systems Safety Research Division, Korea Institute of Machinery & Materials)

7–4 Integrating part modeling and assembly modeling from the perspective of process ................................................................. 39
Zhi-Jia Xu¹,* Pan Wang², Qing-Hui Wang¹ and Jing-Rong Li¹
(¹ School of Mechanical & Automotive Engineering, South China University of Technology, ² The Ministry of Education Key Lab of Contemporary Design and Integrated Manufacturing Technology)
7–5 Discrete Element Method for Investigation on The Soil Characteristics of Shear Deformation ................................................. 40
Jeseung Moon¹, Young-Uk Kim², Soojin Lee¹ and Kyu-Jin Lee¹,‡
(¹ Department of Mechanical Engineering, Myongji University, ² Department of Civil and Environmental Engineering, Myongji University)

New Media & Interaction II

8–1 Appearance and Geometry Acquisition for Realistic Rendering of a Cultural Artifact using SVBRDF ............................................. 42
Junho Choi¹, Yong Hwi Kim² and Kwan H. Lee* (¹,² Gwangju Institute of Science and Technology (GIST))

8–2 A Comparative Evaluation of AR Visualization and Interaction using Wearable Device .......................................................... 43
Minseok Kim¹ and Jae Yeol Lee¹,‡ (¹ Dept. of Industrial Engineering, Chonnam Nat’l Univ.)

8–3 A Rendering Framework for 3D Projection Mapping from Multiple Projections ................................................................. 44
Bilal Ahmed¹, Jong Hun Lee¹, Yong Yi Lee¹ and Kwan H. Lee¹,‡ (¹ Gwangju Institute of Science & Technology)

8–4 Augmenting Three-dimensional Effects in Digital Exhibition using a Multi Projector–Camera System ...................................... 45
Yong Yi Lee, Jong Hun Lee, Moon Gu Son, Bilal Ahmed, and Kwan H. Lee* (School of Mechanical Engineering, GIST)

8–5 The UHD Navigation Signage System: Multi–to–Multi interaction approach with smartphone ................................................. 46
Zulin Liang¹,*, Tetsuro Ogi² (¹,² Graduate School of System Design & Management, Keio University, Collaboration Complex)

Geometric Computing I

9–1 Robust construction of the Voronoi diagram of spheres via topology-oriented incremental algorithm ....................................... 48
Mokwon Lee¹, Youngsong Cho² and Deok-Soo Kim¹,²,‡ (¹ School of Mechanical Engineering, Hanyang University, ² Voronoi Diagram Research Center, Hanyang University)
9–2 Voronoi Diagram of Moving Disks .................................................. 49
Chanyoung Song\textsuperscript{1}, Jehyun Cha\textsuperscript{1}, Mokwon Lee\textsuperscript{2}, Joonghyun Ryu\textsuperscript{2} and Deok-Soo Kim\textsuperscript{1,\#}
(\textsuperscript{1}School of Mechanical Engineering, Hanyang University, \textsuperscript{2}Voronoi Diagram Research Center, Hanyang University)

9–3 Tangent vectors and Cubic Interpolation with Tangent Directions Preserving ................................................................. 50
Xuli Han\textsuperscript{1,\#}, Xiao Guo\textsuperscript{1}
(\textsuperscript{1}School of Mathematics and Statistics, Central South University)

9–4 A Design Framework for the Generation of Planing and Displacement Yacht Hulls .......................................................... 51
Shahroz Khan\textsuperscript{1,\#}, Erkan Gunpinar\textsuperscript{2}, Kemal Mert Dogan\textsuperscript{3}
(\textsuperscript{1}MSc, Istanbul Technical University, Mechanical Engineering Department, \textsuperscript{2}Assistant Professor, Istanbul Technical University, Mechanical Engineering Department, \textsuperscript{3}MSc, Istanbul Technical University, Mechanical Engineering Department)

9–5 Construction of B–spline Surface from Cubic B–spline Asymptotic Quadrilateral ............................................................. 52
WANG Hui\textsuperscript{1}, ZHU Chun-gang\textsuperscript{1,\#} and LI Cai-yun\textsuperscript{2}
(\textsuperscript{1}School of Mathematical Sciences, Dalian University of Technology, \textsuperscript{2}School of Science, Dalian University of Technology)

9–6 Degeneration of Rational Bézier Surface with Weights in the Form of Exponential Function ................................................... 53
Yue Zhang\textsuperscript{1}, Chun-Gang Zhu\textsuperscript{1,\#} and Qing-Jie Guo\textsuperscript{2}
(\textsuperscript{1}School of Mathematical Sciences, Dalian University of Technology, \textsuperscript{2}School of Sciences, Dalian University of Technology)

Emerging Applications of CAD I

10–1 Development of Accurate Estimate Method of Machining Time in Consideration of Characteristics of Machine Tool .................. 55
First Yuki Yamamoto\textsuperscript{1}, Hideki Aoyama\textsuperscript{1}, Noriaki Sano\textsuperscript{2}
(\textsuperscript{1}Department of System Design Engineering, Keio University, \textsuperscript{2}UEL Corporation)

10–2 Enhanced Markerless Surgical Robotic Guidance System for Keyhole Neurosurgery ......................................................... 56
Siyeop Yoon\textsuperscript{1,\#}, Sangkyn Shin\textsuperscript{2}, Hynchul Cho\textsuperscript{2}, Youngjun Kim\textsuperscript{2}, Deukhee Lee\textsuperscript{2}, Laehyun Kim\textsuperscript{2} and Gunwoo Noh\textsuperscript{2,\#}
(\textsuperscript{1}Korea University of Science and Technology, \textsuperscript{2}Korea Institute of Science and Technology)
10-3 Optimization of Hole Making Processes in Consideration of Machining Time and Machining Accuracy .................................................. 57
Eric H. Guiotoko¹, Hideki Aoyama¹ and Noriaki Sano²
(¹Keio University, Graduate School of Science and Technology, Integrated Design Engineering, ²UEL Corporation)

10-4 Quick Calculation of the Aiming Direction of Anti-Aircraft Gun using Trajectory Tables .......................................................... 58
Woo Sung Park¹ and Kang Park²,#
(¹Graduated of Mechanical Engineering, Myongji. Univ., ²Dept. of Mechanical Engineering, Myongji. Univ.)

Design & Architecture & Shipbuilding III

11-1 Development of Pre-operation Module with the Web-based Integration Platform for Surgical Workflow Management ......................... 60
Min Hyuk Woo¹, Seung Ha Kim¹, Hyoung Geun Chi¹, Soo-Hong Lee¹,#, Myon Woong Park² and Jae Kwan Kim³
(¹School of Mechanical Engineering, Yonsei University, ²Center for Bionics, Korea Institute of Science and Technology)

Yushun IDEI, Ryota SUGINO, Keita MUTÔ, Koji KIMITA, Yoshiki SHIMOMURA
(Tokyo Metropolitan University)

11-3 Development of a Quantitative Model for Real Time Estimation of Specifications in Collaborative Product Service System Design ...... 62
Tuananh Tran¹, and Joon Young Park¹,# (¹Department of Industrial & Systems Engineering, Dongguk University)

11-4 Extended Product Architecture Design of Industrial Robots for Integrating Customer Needs, Physical Functions and Entity Structure ........... 63
Kana SAWAI¹,#, Yutaka NOMAGUCHI¹ and Kikuo FUJITA¹
(¹Department of Mechanical Engineering, Osaka University)

11-5 A sketch-based semantic retrieval approach for 3D CAD models ... 64
Feiwei Qin¹, Shuming Gao²,#, Xiaoling Yang², Jing Bai³ and Quhong Zhao¹
(¹School of Computer Science and Technology, Hangzhou Dianzi University, ²State Key Laboratory of CAD&CG, Zhejiang University, ³School of Computer Science and Engineering, Beifang University of Nationalities)
New Media & Interaction III

12-1 Fast Color Transfer from Multiple Images .................................................. 66
    Asad Khan\textsuperscript{1,*}, Lou Jiang\textsuperscript{1}, Wei Li\textsuperscript{1}, Ligang Liu\textsuperscript{1}
    (\textsuperscript{1}Computer Graphics Laboratory, School of Mathematical Sciences, University of Science and Technology of China)

12-2 Parallel N-body Continuous Collision Detection for Large-scale Parallel and Distributed Simulations ................................................................. 67
    Peng Du\textsuperscript{1,2,*}
    (\textsuperscript{1}Hangzhou Dianzi University, \textsuperscript{2}Nanyang Technological University)

12-3 Automatic Measurement of Garment Sizes using Image Recognition ............................................................... 68
    Chunxiao Li\textsuperscript{1}, Ying Xu\textsuperscript{1} and Dongliang Zhang\textsuperscript{1,*}
    (\textsuperscript{1}International Design Institute, Zhejiang University)

12-4 Geometric Method for Detection of Image Quadrilateral ............................................. 69
    Joo-Haeng Lee\textsuperscript{1}
    (\textsuperscript{1}Human-Robot Interaction Lab, ETRI)

12-5 Development of a high quality 3D video representation method for HMD ................................................................. 70
    Sunghyun Yoo\textsuperscript{1}, and Joon Young Park\textsuperscript{1,*}
    (\textsuperscript{1}Department of Industrial & Systems Engineering, Dongguk University)

12-6 Selecting representative images for thumbnails of a large number of images ................................................................. 71
    Tatsuya Nakayari\textsuperscript{1}, Nobuyuki Umezu\textsuperscript{1,*}
    (Department of Interigent System Engineering, Ibaraki University)

Geometric Computing II

13-1 The classification of bi-quintic parametric polynomial minimal surfaces ................................................................. 73
    Caiyun Li\textsuperscript{1}, Chungang Zhu\textsuperscript{1,*}
    (\textsuperscript{1}School of Science, Dalian University of Technology, \textsuperscript{2}School of Mathematical Sciences, Dalian University of Technology)

13-2 Surface Reconstruction from Scattered Points Based on Multilevel Bivariate Spline Quasi-interpolation ................................................................. 74
    Qingjie Guo\textsuperscript{1,*}, Yue Zhang\textsuperscript{2}
    (\textsuperscript{1}School of Sciences, Dalian University of Technology, \textsuperscript{2}School of Mathematical Sciences, Dalian University of Technology)
13-3 Sketch-based Retrieval and Composition for Cartoon Modeling 75
Baobin Liu1, Chunxiao Li1, Hywon Lee2, Ying Xu1, Rod Jan2, Dongliang Zhang1,*
(1 International Design Institute, Zhejiang University, 2 Singapore University of Technology and Design)

13-4 Localized Quasi-(bi)harmonic Field and its Applications 76
Yao Jin1,#, Tongtong Wang1, Yun Zhang2, Jieyi Zhao3, Ruofeng Tong1, Huaxiong Zhang1
(1 School of Information Science and Technology, Zhejiang Sci-Tech University, 2 Institute of Zhejiang Radio and TV Technology, Zhejiang University of Media and Communications, 3 University of Texas School of Biomedical Informatics at Houston)

13-5 Efficient Conformal Tetrahedral Finite Element Mesh Generation for Moving Object with Contact by Mesh Adaptation 77
Hiroki Maehama1,#, Hiroaki Date1 and Satoshi Kana1
(1 Hokkaido University)

13-6 Boolean operations by a robust, exact, and simple method between two colliding shells 78
Jerome Charton1, Leahyun Kim1 and Youngjun Kim1,*
(1 Center for Bionics, Korea Institute of Science and Technology)

Emerging Applications of CAD II

14-1 Efficient registration methods between 2D Xray and 3D CT data of different parts of human skeleton 80
Sungkyung Woo1, Jeonghwan Lee1, Youngjun Kim2, and Kunwoo Lee1,*
(1 Mechanical Engineering, Seoul National University, 2 Center for Bionics, Korea Institute of Science and Technology)

14-2 Segmentation of myocardial geometric model using the Voronoi diagram of coronary artery 81
Jehyun Cha1, Joonghyun Ryu2, Jin-Ho Choi3,4 and Deok-Soo Kim1,2,*
(1 School of Mechanical Engineering, Hanyang University, 2 Voronoi Diagram Research Center, Hanyang University, 3 School of Medicine, Sungkyunkwan University, 4 Department of Emergency Medicine, Samsung Medical Center)

14-3 Registration of an X−ray image and CT data for three−dimensional analysis of whole leg 82
Eungjune Shim1,2, Youngjun Kim1,* Byung Hoon Lee3, Sungkyung Woo4, Kunwoo Lee4
(1 Center for Bionics, Korea Institute of Science and Technology, 2 Korea and the Department of Biomedical Engineering, University of Science and Technology, 3 Department of Orthopaedic Surgery, Hallym University Medical Center, 4 Mechanical Engineering, Seoul National University)
14–4 Optimal Design of the Axial Crown Overcontour for Denture 83

Xun Li and Ming Chen
(Harbin Institute of Technology, Shenzhen Graduate School)

Design & Architecture & Shipbuilding IV

15–1 Dynamic analysis for design and production in shipbuilding 85

Seung-Ho Ham₁, Myung-Il Roh₂, and Hyewon Lee³
(₁Graduate Student, Department of Naval Architecture and Ocean Engineering, Seoul National University, ₂Associate Professor, Department of the Naval Architecture and Ocean Engineering, and Research Institute of Marine Systems Engineering, Seoul National University)

15–2 Collision analysis of block erection by a floating crane 86

Hyewon Lee₁, Myung-Il Roh₂, and Seung-Ho Ham³
(₁Graduate Student, Department of Naval Architecture and Ocean Engineering, Seoul National University, ₂Associate Professor, Department of the Naval Architecture and Ocean Engineering, and Research Institute of Marine Systems Engineering, Seoul National University)

15–3 Determination of Economical Ship Route using Simultaneous Optimization Method 87

Sung-Min Lee₁, Myung-Il Roh₂, and Ki-Su Kim³
(₁Department of Naval Architecture and Ocean Engineering, Seoul National University, Seoul, ₂Department of the Naval Architecture and Ocean Engineering, and Research Institute of Marine Systems Engineering, Seoul National University)

15–4 Diagnosis of rotor–stator Rubbing using Time–Frequency analysis 88

Kyu-Tack Hong₁, Seyun Hwang₂, and Jang-Hyun Lee₁
(₁Department of Naval Architecture and Ocean Engineering, INHA University, ₂Institute of Industrial Technology, INHA University)

15–5 UGV effectiveness analysis based on pathloss models of C2 communication network 89

Jaeyeong Lee₁, Sunwoo Shin₂, and Chongman Kim³
(₁Senior Research Fellow in Myongji University, ₂Master’s Course in Department of Industrial Engineering and Management atMyongji University, ³Professor inDepartment of Industrial Engineering and Management atMyongji University)

15–6 Design Correction Method of Decorating Film and Shrink Film in Consideration of Forming Deformation to Get Distortion–Free Design 90

Shoko Fujii₁, Suzuki Ruka², Hideki Aoyama², and Yukio Mori³
(₁School of Integrated Design Engineering, Keio University, ₂Department of System Design Engineering, Keio University, ³Nanjo Sobi Kogyo Co., Ltd.)
New Media & Interaction IV

16–1 Mass Transport based Multi–model Color Transfer ........................................ 92
Yantao Liu1,2, Shengjing Tian1, Meng Liu1 and Xiuping Liu1,*
(1 School of Mathematical Science, Dalian University of Technology, 2 School of Science, Dalian Minzu University)

16–2 A Correlative Classifiers Approach based on Particle Filter and Sample Set Method for Tracking Occluded Target .................................................. 93
Kang Li1,2, Fazhi He1,2,* and Jian Zhang1,2
(1 State Key Laboratory of Software Engineering, Wuhan University, 2 School of Computer Science, Wuhan University)

16–3 Calibrating 3D Point Cloud captured through Bent Refractive Medium ................................................................. 94
Sungkuk Chun1,2, Seungpyo Hong1 and Jinwook Kim2,*
(1 Department of HCI and Robotics, University of Science and Technology, 2 Imaging Media Research Center, Korea Institute of Science and Technology, 3 SD Optics Inc.)

16–4 Photographic Mosaics Maintaining Image Boundaries ........................................... 95
Nobuyuki Umezu1,*
(1 Ibaraki University)

16–5 A Novel Method of Depth Information Acquisition of Stereo Matching based on Microarray Camera ................................................................. 96
ZOU Jiancheng1, LI Dan1,*
(1 Institute of Image Processing and Pattern Recognition)

16–6 A New Method of Low Illumination Image Enhancement Based on Microarray Camera ................................................................. 97
ZOU Jiancheng1, ZHENG Wenqi1,*
(1 Institute of Image Processing and Pattern Recognition, North China Univ. of Tech)

Geometric Computing III

17–1 Comparison Between Penetration Analysis of 5.45mm and 7.62mm AP Bullet Using ANSYS ................................................................. 99
Ju Gyeong Shin1, Kang Park2,* and Gun In Kim3
(1 Graduate School of Mechanical Engineering, Myong-ji Univ., 2 Dept. of Mechanical Engineering, Myong-ji Univ., 3 Dept. of Defense Acquisitions, Konkuk Univ.)

17–2 Penetration Simulation for the Vulnerability Analysis of the Combat Vehicle ................................................................. 100
A Hyoun Cho1, Gun In Kim1,*
(1 Graduate School of Mechanical Engineering, Myong-ji Univ., 2 Dept. of Defense Acquisitions, Konkuk Univ.)
17–3 Beam Hardening Correction using Redundancy of X-ray CT projection images ................................................. 101
Mitsuru Negishi$^1$, Yutaka Ohtake$^1$, Hiromasa Suzuki$^1$, and Yukie Nagai$^1$
($^1$ Department of Precision Engineering, The University of Tokyo)

17–4 2D Wavelet Transform Data Compression with Error Level Guarantee for Z-Map Models .............................................................. 102
Keisuke Yokota$^1$, Nobuyuki Umezu$^1$ and Masatomo Inui$^1$
($^1$ Ibaraki University)

17–5 Minimum Variation Log-aesthetic Surface .................................................. 103
Sho Suzuki$^{1,2}$, R.U.Gobithaasan$^2$, Peter Salvi$^3$, Shin Usuki$^1$ and Kenjiro T.Miura$^1$
($^1$ Shizuoka University, $^2$ Universiti Malaysia Terengganu, $^3$ Budapest University of Technology and Economics)

17–6 Construction of Multi-Level Morse Complex to Extract 3D Shape of Assembled Parts on CT Volume .............................................................. 104
Sho Watanabe$^{1,2}$, Yutaka Ohtake$^1$, Yukie Nagai$^1$ and Hiromasa Suzuki$^1$
($^1$ The University of Tokyo, Department of Precision Engineering)

Emerging Applications of CAD III

18–1 Build analysis and verification for 5-axis metal 3-D printing ........ 106
Kyubok Lee$^1$, Haeseong Jee$^2$
($^1$ Hongik University, Graduate School, Mechanical Engineering, $^2$ Hongik University, Dept. of Mechanical System & Design Eng.)

18–2 Open Heating Systems for ABS Material Output of FDM 3D Printer .............................................................. 107
Binbin Fu$^1$, JooHyung Lee$^{1,2}$ and Sangho Park$^2$
(Sangho Park, Chungnam National University)

18–3 Evaluation of Machined Surface Roughness through Image Processing .............................................................. 108
Besmir Cuka$^1$, Dong-Won Kim$^{1,2}$ and Jong-Young Lee$^1$
($^1$ Department of Industrial Systems Engineering, Chonbuk National University)

18–4 Cryogenic Cooling for the High Speed Milling of Compacted Graphite Iron .............................................................. 109
Mohd Azlan Suhaimi$^1$, Dong-Won Kim$^{2,3}$ and Zagdsuren$^2$
($^1$ Department of Materials, Manufacturing, and Industrial Engineering, Faculty of Mechanical Engineering Universiti Teknologi Malaysia, $^2$ Department of Industrial Systems Engineering, Chonbuk National University)
18–5 Muscle property prediction method using optimization and neuro–musculoskeletal model .......................................................... 110

Younguk Kim1, Woo-seong Choi1, Jungmi Seo1, and Kunwoo Lee1#
(1 School of Mechanical and Aerospace Engineering, Seoul Nat’l Univ)

18–6 Automatic Registration of Laser–Scanned Point Clouds of Bridges using Linear Features ......................................................... 111

Hiroaki Date1#, Takahito Yokoyama1, Satoshi Kanai1, Yoshiro Hada2,
Manabu Nakao3, and Toshiya Sugawara4
(1 Hokkaido University, 2 Fujitsu Ltd, 3 Fujitsu Ltd, 4 Docon Co.,Ltd)

P–1 Optimum Design to Increase Lifetime of Magnetic Field Control Seal for Revolution Number Detection of Automobile Driving Part ........... 113

Hyun Jin Choi1#, Chul Woo Park1, Jong Seo Woo2, and Jong Gab Kim2
(1 Machinery & Robot Research Division, Daegu Mechatronics & Materials Institute, 2 Jinyang Oil Seal Co., Ltd.)

P–2 Automating Preliminary CPM Scheduling Based on Structured Knowledge Embedding ........................................................................ 114

Sungrae Kim1, Seunghee Kang1 and Youngsoo Jung1#, Namhyun Cho2, Chang-Weon Lee2
(1 Myongji University, 2 Incheon International Airport Corporation)

P–3 Design of Series Hybrid Electric Combat Vehicle Considering Traction Motor Model ........................................................................... 115

Dae-Kee Kim, Dong-Min Kim, Jung-Pyo Hong and Seungjae Min
(Department of Automotive Engineering, Hanyang University)

P–4 PREDICTION OF SOIL STRENGTH INPUT FOR SIMULATING MODULE OF VEHICEMOBILITY USING ARTIFICIAL NEURAL NETWORKS .......... 116

Jun-Ho Moon, In-Jong Moon and Young-Uk Kim#
(Dept. of Civil and Environ, Eng, Myongji University)

P–5 High–speed Soft Composite Actuator Using 3D Printing .................................................................................................................. 117

Sung-Hyuk Song1, Min-Sik Kim1, Jang-Yeob Lee1, and Sung-Hoon Ahn1,2,#
(1 Department of Mechanical and Aerospace Engineering, Seoul National University, 2 Institute of Advanced Machineand Design, Seoul National University)

P–6 An Algorithm for Bi–directional Acquisition of 3–dimensional Data for Dental CAD/CAM ........................................................................ 118

Sungbin Im1# and Minho Chang1
(1 Department of Mechanical Engineering, Koera University)
P-7 Virtual Design and Evaluation Framework and Process for Design of Squat Exercise Programs and Machines ........................................ 119
Haerin Lee¹, Moon Ki Jung² and Sang Hun Lee¹,*
(¹Intelligence and Interaction Lab., Graduate School of Automotive Engineering, Kookmin University, ²AnyBody Technology A/S)

P-8 Prediction of Driver’s Lane Change Intention Using Multi-Boosting Algorithm ................................................................. 120
Haerin Lee¹, Moon Ki Jung² and Sang Hun Lee¹
(¹Kookmin University, ²AnyBody Technology A/S)

P-9 Three-dimensional Blood Vessel Modeling with CT, OCT and IVUS Images for Stenting Simulation ........................................ 121
Junghyeok Lee¹ and Young Choi¹,*
(¹School of Mechanical Engineering, Chung-Ang University)

P-10 A Modified Coons AT-Patch with Multiple Parameters ........................................ 122
Jin Xie¹,* and Xiaoyan Liu²
(¹Institute of scientific computing, Hefei University, ²Department of Mathematics, University of La Verne)

P-11 Acceleration of Delaunay Refinement Algorithm for Quality Polygon Triangulation ..................................................... 123
Donguk Kim
(Dept. of Industrial and Management Engineering, Gangneung-Wonju National University)

P-12 Augmented Reality-based Remote Collaboration for Instruction and Information Sharing .............................................. 124
Sungho Choi¹ and Jae Yeol Lee¹,*
(¹Dept. of Industrial Engineering, Chonnam Nat’l Univ.)

P-13 Reliable phase unwrapping method in a combination of gray-code and phase-shift light projection ...................................... 125
Seongje Jang¹, Yonghee Hahm¹ and Kunwoo Lee¹,*
(¹Seoul National University)

P-14 Gesture based 3D Navigation for Virtual Tour ........................................ 126
Kyeong-Beom Park¹ and Jae Yeol Lee¹,*
(¹Dept. of Industrial Engineering, Chonnam Nat’l Univ.)

P-15 Definition of functional requirements to integrate 3D shape, specifications, and ports for the construction of equipment and materials catalog library .......................................................... 127
Jaesun Lee¹, Yoenju Bae¹ and Duhwan Mun¹,*
(¹Department of Precision Mechanical Engineering, Kyungpook National University)
P-16 Design of UG NX–based APIs for the simplification of 3D CAD assembly models ................................................................................................................................. 128

Eun-seop Yu¹, Juho Lee², Jeong-youl Lee³ and Duhwan Mun¹,*
(¹ Department of Precision Mechanical Engineering, Kyungpook National University, ² School of Mechanical and ICT Convergence Engineering, Sunmoon University, ³ IT Convergence Research Team)

P-17 An Implementation of Plantar Pressure Measurement System for Virtual Reality Treadmill Navigation ............................................................................................................. 129

Moohyun Cha¹*, Soonhung Han², Hyungki Kim¹ and Duhwan Mun³
(¹ Korea Institute of Machinery and Materials, ² Korea Advanced Institute of Science and Technology, ³ Kyungpook National University)

P-18 A Study on Data Measurement using Unmanned Vehicle for Performance Analysis of Omni-directional Treadmill .............................................................................. 130

Hyungki Kim¹*, Moohyun Cha¹, Hanmin Lee¹ and Duhwan Mun²
(¹ Korea Institute of Machinery and Materials, ² Kyungpook National University)
